

EMF, RF AND MICROWAVE SURVEYS

TESTING, ASSESSMENT AND MITIGATION OF ELECTROMAGNETIC FIELDS

This 1-day workshop will provide participants with an overview of the frequency spectrum, physics of electromagnetic fields, common external and internal sources, the appropriate testing instrumentation and methodologies; data evaluation criteria and mitigation approaches.

Mock-up EMF sources and testing equipment will be brought by the instructor and utilized to provide real life situations to the students. This class is designed as an interactive workshop. Topics Include:

- Power Lines
- Building wiring systems
- Transformers
- Appliances
- Cell Phones
- Wireless local area networks (WLAN)

Architects, industrial hygienists, electricians, building inspectors, environmental consultants, and indoor air quality professionals are encouraged to attend.

COURSE REGISTRATION FORM

You can call us to register or fill out the registration form, check the course type and date(s), payment method and fax it to us at 760-804-9433 or email the information to info@ETandT.com
