Health and Safety Technician (HST) Certification Course

OSHA General Industry Regulations apply to all business facilities.

This 2-Day course with exam provides an overview on the OSHA regulations. The course is a requirement to achieve the IICRC Master Status and AMRS Certification. Our HST course is specifically geared towards the cleaning, restoration, microbial remediation and building industry.

If you are using cleaning chemicals, personal protection equipment or deal with blood-borne pathogens, you need to have written programs in place.

All students will receive a 10-hour OSHA card and a copy of the OSHA Standard.

This course will help you understand these regulations, how they apply to your business, how to keep your facility up to standards, understanding the record keeping requirements, preventing fines and be aware of your rights when the inspector shows up at your company door step.

The HST class also qualifies for 2 IICRC continuous education credits (CEC).
